Software Engineer

Software Engineer with a Unique Blend of Creative and Technical Expertise

Full-stack developer with experience in HTML, CSS, JavaScript, and React, with a background in freelance work and hackathons. Strong communication skills and adaptability, with a commitment to continuous learning and a passion for creating user-friendly applications that solve real-world problems.

I am a 23-year-old music producer and audio engineer with a deep passion for all things music. I have a background in legal services and hold a bachelor's degree in political science. In addition to my music career, I am an avid learner in the fields of programming and computers, which has become my true passion. I also ran track in both high school and college, and I enjoy exploring cinematography. My diverse experiences have shaped me into a versatile professional who thrives in creative and technical environments.

Technical Skills

Javascript | Typescript | React | HTML, CSS | Express | SQL | Prisma
Git | Github | Bash | Linux | Vitest | Jest | React Router | Zod | Trello | NextJS

Technical Projects

Technical Projects

Cinema Vision | [GitHub Repo](#) | Loom

Skills: React, JavaScript, HTML, CSS, API Integration

- Developed an application using the IMDb API to allow users to search, discover, and rate movies, providing detailed film information.
- Designed a user-friendly interface with dynamic elements to enhance user experience and improve usability.
- Implemented a favorites section enabling users to track movies of interest. Continuously refined features based on user feedback.

Dulinagi Axe Services Inc. | [Website](#) | Loom

Skills: HTML, CSS, Responsive Design, SEO

- Designed and developed a mobile-responsive website for a cleaning service in Massachusetts, ensuring optimal performance across devices.
- Managed domain registration and hosting setup, improving site accessibility and performance.
- Implemented SEO practices to boost visibility and improve search engine ranking.

Name that fish | [GitHub Repo](#) | Loom

Skills: React (Functional & Class Components), State Management, JavaScript, CSS, UI/UX Design

- Built an interactive guessing game using React, allowing users to guess fish names with real-time feedback through correct/incorrect counters.
- Leveraged both functional and class-based components to showcase proficiency in React and state management.
- Enhanced user experience by dynamically displaying and removing fish names as they are guessed correctly, creating a smooth, engaging interface.

Professional Experience

Freelance Full-Stack Developer, Remote | May 2024 - Present

- Delivered a user-friendly website for a cleaning company, enhancing their online presence and improving customer engagement using HTML, CSS, JavaScript, and React.
- Implemented responsive design principles to ensure optimal functionality across devices, increasing mobile traffic.
- Developed a booking system that streamlined client interactions, improving user experience and increasing efficiency.

Paralegal, Wilson Jones Carter & Baxley, Greenville, SC | July 2023 - May 2024

Skills: Legal Document Preparation, Case Management, Legal Research, Client Support, Workers' Compensation Law

- Managed a caseload of 50+ workers' compensation claims, ensuring timely submission of legal documents and correspondence, contributing to a 30% reduction in processing delays and faster settlements.
- Collaborated with attorneys and medical professionals to gather evidence and reports, leading to favorable outcomes in 85% of contested claims, significantly improving client financial recovery.
- Conducted detailed legal research on case law and medical terminology, enhancing case arguments and increasing settlement success rates by 20%.
